

Using the GlobalMed TotalExam Camera

The GlobalMed TotalExam 3 camera, designed specifically for telemedicine, is an easy-to-use hand-held photo/video system. The device includes interchangeable lenses and incorporates high definition camera technology to stream images and video of the human body. It also integrates easily with OTNhub eVisit Videoconference, enabling you to share your examination with others in a videoconference.

The GlobalMed TotalExam 3 camera and its attachments are “class 1” medical devices*. The unit is certified for use on the OTN Network when connected as an auxiliary camera source with OTNhub Videoconference. The camera connects via a USB cable into a Windows-based PC or a Mac with a USB 3.0 port.

There are no drivers or software to install or download and it does not require an external power supply (it is powered via the USB 3.0 connection).
