

Desktop – Cisco DX80

Key Features:

- All-in-one unit: codec, camera, monitor, microphones and loudspeakers
- Designed primarily for use by consultants in a clinical setting
- Touch-based on-screen controls
- The Dx80 can be used as an external monitor when plugged into a laptop
- The camera can be tilted and used as a document camera
- The monitor can be inclined to give users a more comfortable position at their desk
- Optimal use in settings where a small number of users (max 3) can sit comfortable in front of the camera

Limitations:

- Fixed camera with 2x digital zoom capabilities
- Medical peripherals cannot be connected
- Hinged LCD screen
- Does not use a remote control

Basic Specifications:

- Dimensions: 20" H x 22" W x 3.5" D
- Display - 23" with integrated speakers
- 3.5 mm headphone audio jack
- Data sharing included in the package
- HDMI port to connect a PC
