Registering for Events

- **There are two ways to self-register for an event:**
 - **By accessing a link to an event sent to you by email;**
 - **By selecting an event that appears on the public calendar.**

E-mail Notifications

When planning an event, some organizers will send an email announcing the details and inviting interested parties to register or confirm their system details. This email will contain both a description of the event and a hyperlink in the body of the text.

Supporting Materials:	N/A

[3] If you find an event that interests you, please click on the title link of the event. The event details page will provide key information including: Event Date, Registration Deadline, Event ID, Description and Registration Instructions.

The screenshot shows a web interface with a left-hand navigation menu and a main content area. The navigation menu has a 'Resources' section with a sub-link 'Public Events' circled in red and a small box containing the number '4' next to it. Below 'Resources' is a 'What's New' section with a message: 'You asked for it...OTN is delivering. Soon OTN will...'. The main content area has a green header bar with a door icon and the text 'Registration Open: Deadline Nov...'. Below this, there are four lines of event details separated by dotted lines: 'EVENT DATE: Wed, Nov...', 'CHAIR / PRESENTER: Andrew Mc...', 'EVENT TITLE: Tandberg B...', and 'YOUR SYSTEM(S): TOR_OTN_...'.

[4] To directly register your system for the event, logon to Ncompass and select the Public Events link under the Resources heading. This will provide a listing of all the public events for the month.

Register for Public Event

- **Remember, there are rules about when changes can be made to an event. The last possible time that changes can be made in Ncompass is noon on the business day before the event is to occur.**
- **Please contact Scheduling Services if you are unable to make the change. You can contact the Scheduling Services by dialing 1-866-454-6861.**
- **Finally, it is always good practice to inform the host of the event of any alterations you have made to it.**

Ncompass Terminology

Auto Initiate	An Ncompass feature that enables events to start and end automatically without manual intervention. This means that if you schedule an event to start at 8:00 AM, the systems involved will automatically connect at that time, providing the videoconferencing systems have been turned on
Clinical Event	An event that directly or indirectly discloses patient information.
Event Access	A field in Ncompass that determines whether participants can register/deregister their own systems for the event.
Multipoint	An event involves more than three sites involved in the event requires a bridge. A bridge acts like the hub of a wheel, bringing together the spokes or in this case the individual sites in a videoconference. All multipoint events have a clearly defined start and end time and must be scheduled at least 30 minutes before they are to occur.

Ncompass Terminology

Ncompass	Ncompass is an online scheduling tool designed for OTN Members to schedule and manage videoconferencing events. It's simple to use, secure and gives OTN Members access to the same scheduling information as OTN's Scheduling Services.
Point-to-point	An event that takes place between two videoconference systems and do not require the involvement of a bridge. Consequently, point-to-point calls can be scheduled at any time. In addition, point-to-point events provide users with portal calling features.
Private Event	The host registers the sites that will attend the event. It is also the host's responsibility to contact all the participants that are registered.
Public Event	The event is published in Ncompass and participants can register their own system to the event.
